FREQUENTLY ASKED QUESTIONS

How should I interpret the “Percentage of Housing Units Enumerated” column?

Of the housing units in your state, this is the percentage enumerated either through self-response or as part of our field data collection operations.

What do the three columns in the table mean?

Percentage of housing units self-responded:

The percentage of self-responding housing units reported in the response rate map <<https://2020census.gov/en/response-rates.html>>.

Percentage of housing units enumerated in NRFU:

The percentage of total housing units resolved in the field during the Nonresponse Followup (NRFU) Operation (excludes self-response). Cases completed in the field for Update Enumerate and Remote Alaska Operations are included in this rate to ensure coverage of the full housing unit universe. This rate does not reflect the progress within the NRFU operation as it is relative to total housing units and not just the NRFU workload.

Percentage of housing units enumerated:

The cumulative percentage of total housing units enumerated via self-response or during the NRFU Operation as of 11:59 p.m. of the previous day. This rate will always increase.

Does the self-response rate match the rate in the 2020 Self-Response Rate map?

Yes. See the response rate map <<https://2020census.gov/en/response-rates.html>>.

How often will you publish this table?

We will post it to the Web site by 3 p.m. EDT daily. Updates will begin August 19.

Where can I find a comparable table for the 2010 Census?

The U.S. Census Bureau has not historically produced a table that shows this information by state during data collection operations.

The Operational Assessments for the 2010 Census are the most complete source of operational data from the various 2010 Census operations. You can find them at <www.census.gov/programs-surveys/decennial-census/decade/2010/program-management/cpex.html#par_list_528542037>.

What is included in the denominator?

All housing units in the United States or state. For Puerto Rico, all housing units in Puerto Rico.

How does the Census Bureau use these data?

The Census Bureau is committed to a complete and accurate count. This table provides our progress.
